

IDUS ONLINE

MAINTENANCE SOFTWARE

EVERYTHING YOU NEED TO SUCCEED
WITH YOUR MAINTENANCE OBJECTIVES

Everything you need

Maintenance activities

Manage all your maintenance activities like preventive maintenance, inspections and closed workorders. Create, plan and distribute work.

Notifications

Reach a new level of teamwork and knowledge transfer by taking part of what's happening in real time.

Asset Management

Organize your plant and technical data in a simple hierarchy where everything is accessible with just a few clicks.

Dashboard

Stay up to date with the built in dashboard. You can easily adjust and configure your dashboard and KPIs.

Mobile App

Take your CMMS with you and never miss the opportunity to create a work order, look at old work orders or overlook the technical data.

Maintenance Store

Organize your maintenance store in Idus Online. Overview current stock levels, run reports and analyze what can be improved.

Reports & KPIs

Run reports and take the pulse on your plant and operation. Analyze your data and use it in your continuous improvement.

Purchasing

See what needs to be purchased and how much, email the supplier directly from the maintenance system.

Settings

Take control of your maintenance software and adjust it yourself after your objectives, everyone can learn how to use Idus Online.

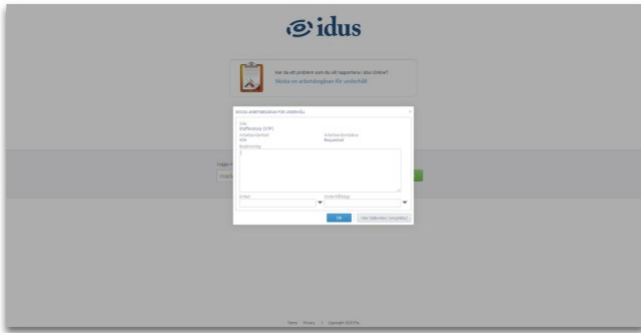

100% Cloud based

Idus Online is a true cloud software, you don't need to install anything or worry about expensive updates.

Find out more

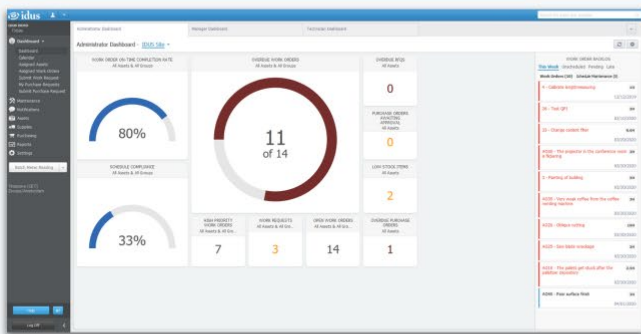

Gather every fault

Idus Online allows an unlimited amount of people to report faults or leave any other request for work without logging in.

- Fault reporting from the login page.
- Fault reporting from the app startpage.

Stay up to date

The fully customizable and interactive overview gives you a bird's eye view of the maintenance operation. Regardless if it's about work orders, the store or your KPIs the information is always there accessible in real time.

 A screenshot of the idus Work Orders table. The table lists various maintenance tasks with columns for:

- Work Order ID
- Description
- Location
- Status
- Priority
- Start Date
- End Date
- Assigned To
- Progress

 The table contains multiple rows of data, with some rows highlighted in different colors (blue, green, red) to indicate different statuses or priorities.

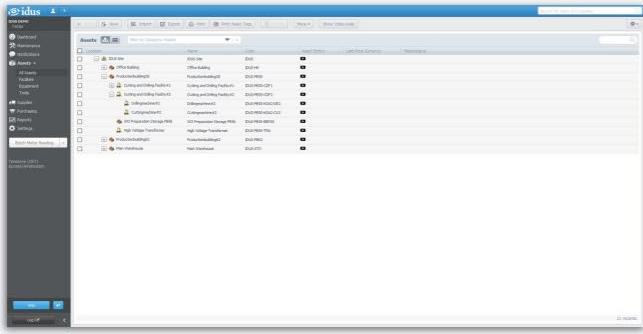

Plan your maintenance

Overlook the demand for maintenance from a single place and waste less time on administration. From here you can easily filter, plan and schedule your work.

Distribute work orders

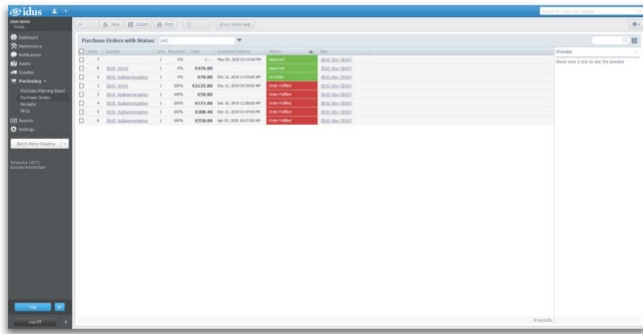

Reduce your work order-backlog in the weekly planner. From here you can drag and drop work orders and assign personnel by their available time.

Organize your plant

Find everything in your plant with just a few clicks.

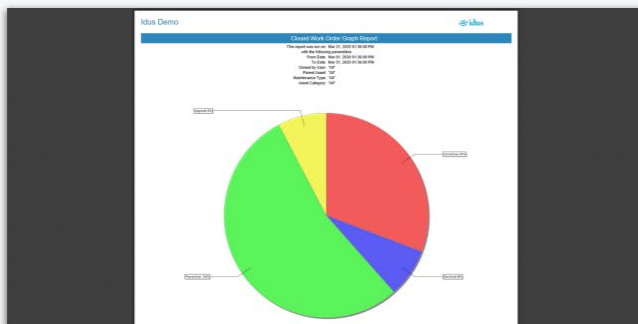

- Import your current plant register from Excel.
- Organize your entire plant from a single place.
- Copy, move and organize with drag and drop.
- Manage multiple production plants with Multi-Site.

Optimize your store

Organize, manage and optimize your maintenance store.

- Find the right balance of inventory levels and ABC-classes.
- Use bill of materials to simplify your work.
- Send purchase orders directly to the suppliers.
- Integrate with your ERP and spend less time on admin.

Make datadriven decisions

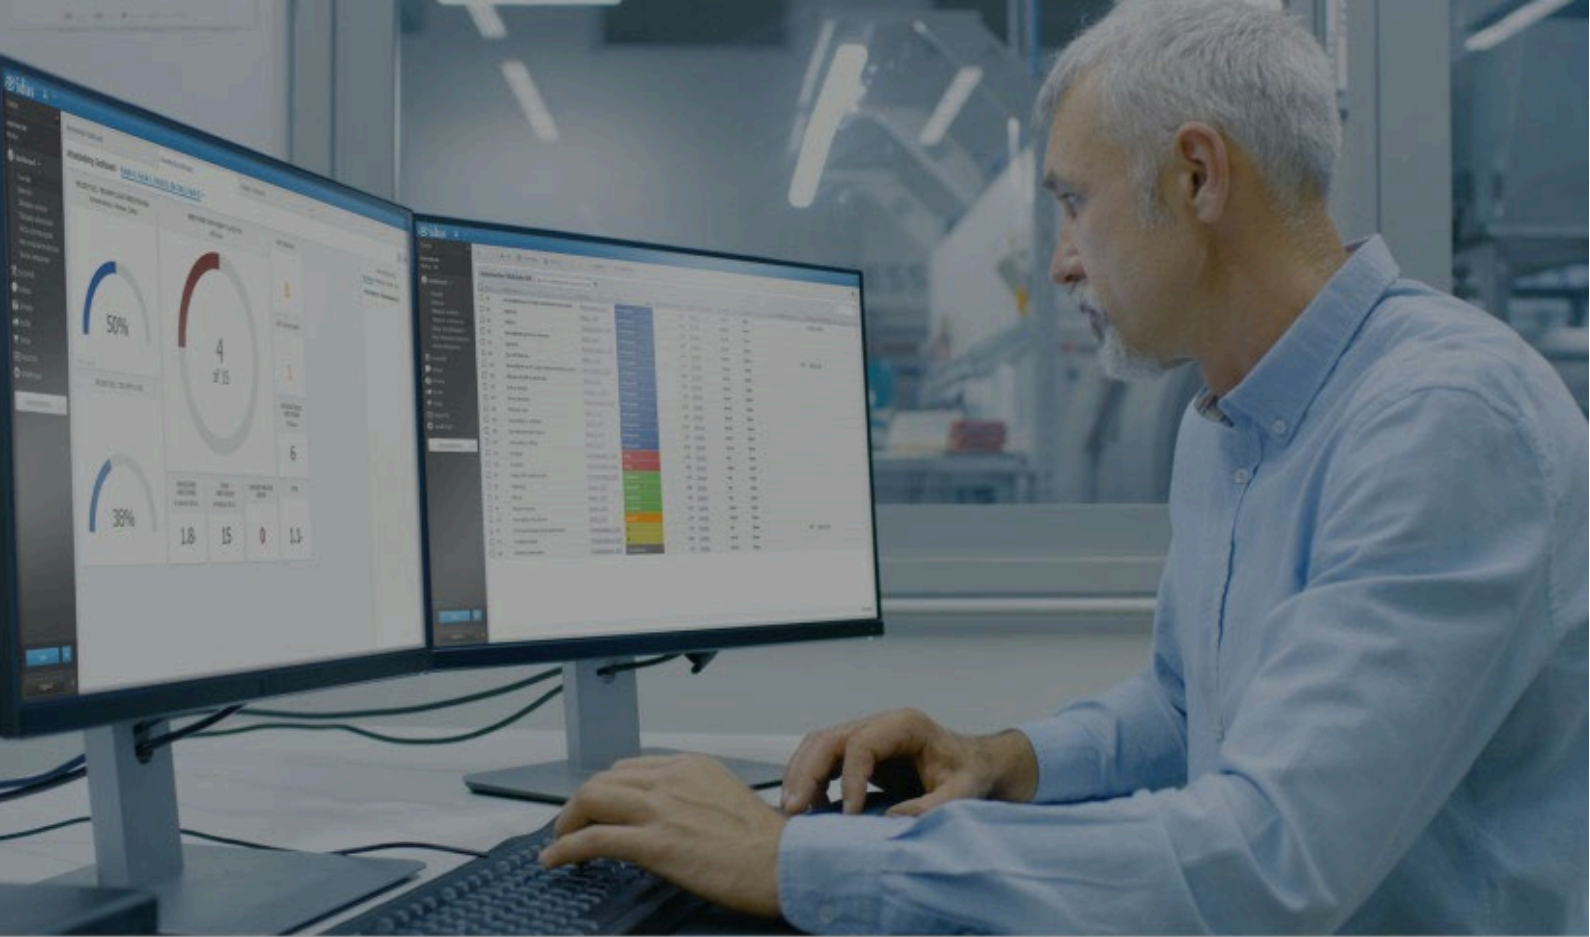

Make more data driven decisions by running some of the 100+ reports that are available in the system.

- Schedule reports directly to your inbox.
- Create custom reports in the report design tool.
- Run reports on audits and regulatory requirements.

+ Much more!

It doesn't stop there! Idus Online contains a lot more functions for your team. Contact us and we will show you the rest!

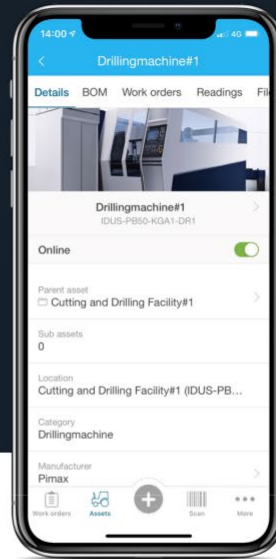

Do the right maintenance at the right time!

Plan, track and improve your maintenance together.
Reduce your overall waste and reach measurable results.

Idus Maintenance App!

Maintenance work anywhere
without any limitations.

Create activities

Create activities directly in the field or on the go in your plant. Make sure that everything is always saved in order to plan and schedule the maintenance.

Close work orders

Close work orders when out in the field with worked hours and other useful data like measure, failure code and knowledge for the next time.

Overview equipment

Overlook the technical data and the spare parts of the equipment before you, see what jobs have been carried out before and how faults were corrected and open documents.

With or without internet

The app functions are accessible with or without internet. The app stores your work orders, closed jobs or other information until you receive connection again.

Simplicity is key

No installations, no upgrades!

With Idus Online you will never need to think about updates again. With our true cloud solution your system will be created with a click and updates will happen automatically.

Integrate with whatever you want!

The built in integration hub will make it super easy to connect the CMMS with anything, if you have an idea of what you want to transfer we make it happen.

Maintenance systems for 30 years

At Idus, we have developed and implemented maintenance systems for almost 30 years, which means that we have gathered a great deal of knowledge about what a maintenance operation really needs to reach its full potential. Contact us and we'll talk more about yours!
